### About Me

Skilled and motivated web developer with 1 year of experience in designing and developing dynamic, user-friendly websites. Proficient in front-end technologies such as HTML5, CSS3, JavaScript, and responsive design frameworks. Demonstrated expertise in leveraging modern web development tools and libraries, including React and Angular, to build intuitive and visually appealing interfaces..

### Professional Experience

Cluster Valley. | Junior Angular Developer  
2022 – Present

Key responsibilities :

- Worked on different Projects like Simplify VMS, HABEKO and PAPA JOHNS. Implemented different designs using HTML, SCSS, JAVASCRIPT. Created mobile friendly applications Integrated third party libraries and frameworks such as React and Angular using angular material and react bootstrap for better design.
- Implemented RESTful APIs and integrated them into the frontend to facilitate data exchange between the client and server
- Played a key role in troubleshooting and debugging issues, utilizing Chrome DevTools and other tools to diagnose and resolve frontend-related problems.

### FYP (FINAL YEAR PROJECT) LOG ANALYSIS USING ELK STACK

- Developed the web application on React for its component-based architecture, enabling modular and efficient frontend development.
- Applied Material UI and React Bootstrap to design visually appealing and user-friendly interfaces, elevating aesthetics and user engagement.
- Conducted Data validation through Yup and seamlessly managed form inputs using Formik, ensuring reliable user interactions and data integrity
- Elevated project's analytical capacity with graphs and charts designed using Recharts and ApexCharts, facilitating comprehensive data interpretation
